

# TRANSFER LOOP SYSTEMS

Precision engineered TRANSFER LOOP systems from RTR provide trouble-free easy installation solutions. Offering high-strength protection suitable for the harshest environments. The solid brass core material ensures a long corrosion free life. A wide range of pre-sized versions are available as well as custom made lengths to order.

Manufactured in Germany to the highest standard all systems are supplied with fixing screws and internal nylon ferrules to prevent the possibility of damage to cables.

## Application examples:-

Automatic Swing Doors  
Access Control Systems  
Cable Screening  
Electro hold-open door closers

Heavy duty and concealed transfer loops also available. Details upon request.
