

## ACCESSORIES

In addition to the automatic door operator mechanism there are a number of other essential components required to complete an installation in both a safe and professional manner. RTR has wide ranging experience in the automatic door industry, manufacturing and distributing a comprehensive range of accessories to help the professional installer.

Often, the only real differences between an acceptable and a first class installation are the small finishing touches, such as transfer loops, engraved switch plates and signage, to name but a few. Most items from our range are available off the shelf. Also, we provide a quick turn round for specialised engraved items, which will assist your planning as well as reducing the stock you need to carry. All our products are proven quality, so you can be confident they will meet your needs for both functionality and durability.

To illustrate the scope of our product range, the following list identifies some of the many items we supply. This selection is by no means exhaustive and we are always pleased to consider bespoke production to match particular site or customer requirements

## ACCESSORIES

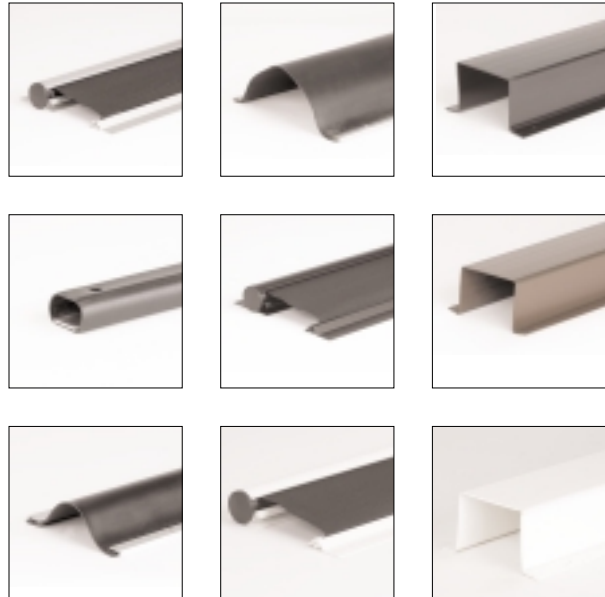

Listed below are a small selection of items from our range. This selection is by no means exhaustive and we are always pleased to consider bespoke production to match particular site or customer requirements

### Legend Plates & Key Switches

Legend plates to suit a variety of key switches and push buttons. Available as plate only or assembled. With or without engraving.

### Finger Guards

Cost effective solutions for anti finger trap on a variety of door styles.

### Floor Guides

A range of single and double rollers to suit aluminium doors and bottom rails for glass doors. Robust passivated steel base and rubber rollers of differing diameters to suit a variety of profiles.

Floor guide for 10mm glass door leaves, strong stainless sleeve holds the engineering grade nylon inner secure.

### Various

Armoured transfer loops, pulse relays, power supplies and break glass units are just a few of the miscellaneous items we stock to make your install that much easier. Signage to cover all legislative requirements is available from stock.

### Door Stops

A very solid door stop with 3 screw fixing in anodised aluminium finish.
